Skilled in building scalable web solutions, improving user experience, and contributing to product success through clean, efficient code and strong collaboration. Experienced in both corporate and startup environments, with additional background in digital analysis and teaching.

Skills

Languages: JavaScript, Java, C#, SQL, Python

Frameworks и libraries: React, .NET in VS, Firebase

Tools & Tech: Git, REST APIs, GraphQL, Adobe Photoshop, WordPress, VS Code, IntelliJ

Concepts: OOP, MVC, Algorithms & Data Structures, Responsive Design, UI/UX

Experience

iTransition Group | Minsk, Belarus
Software developer | February 2025 - June 2025

1. Multi-language Form Builder (Google Forms Clone):
   - **Tech Stack:** ReactJS, Node.js, MySQL, Sequelize, Bootstrap
   - Developed a fully responsive multi-language application inspired by Google Forms
   - Enabled users to create, share, and manage dynamic forms with various question types (text, multiple choice, checkbox, etc.)
   - Implemented user authentication, form visibility controls (public/restricted), and analytics
   - Supported tag-based search, drag-and-drop question ordering, and real-time form submission tracking

2. Collaborative Presentation Application
   - **Tech Stack:** ReactJS, Firebase (Realtime DB), Express.js
   - Built a real-time collaborative platform where users can create or join presentation rooms
   - Allowed drawing, writing, and shape insertion on slides, all synchronized live with viewers
   - Integrated real-time cursor tracking, slide transitions, and presentation previews
   - Deployed using Render with persistent collaboration sessions

3. Logic-based Games Collection
   - **Tech Stack:** JavaScript, HTML5, CSS3
   - Created interactive logic-based games such as a Dice Game and Number Guessing Game
   - Focused on game mechanics, state management, and responsive design
   - Enhanced player experience through dynamic feedback and animation
